

In a brief three years,
South Carolina has fallen
behind 34 states in workers'
compensation premiums.

LET'S MAKE A CHANGE

In a struggling economy with unemployment rates on the rise, we must take action in SC to bring stability and predictability back to our workers' compensation system.

In 2008, we can begin to change SC's business climate by replacing the outgoing commissioners with new commissioners, who believe in making our state a viable player on the expanding, global field.

To compete in an international market South Carolina needs new commissioners, objective standards for awards and accountability of attorney fee awards.

Please contact your Senator today at **www.scstatehouse.net/cgi-bin/zipcodesearch.exe**, or **(803) 212-6200** and urge them to support appointments to the commission, who will bring fairness and consistency to our precarious workers' compensation system.

Let's begin to make a change in SC, reforming our workers' compensation system and preparing for our economic future.
